

How to use the Engine

1. Go to [Google Colab](#)

2. On the top left corner, Go to File > Upload new Notebook.

3. In the pop up box that appears, enter basu-10 and click on the most recent version (most recent date and time) of the Algorithm. The date and time is at the end of the file name.

4. After the Notebook has loaded, Scroll down to see the Instructions and run the Code Blocks.
