How to use the Text to Art Engine

1. Go to [Google Colab](https://colab.research.google.com/)

2. On the top left corner, **Go to File > Upload new Notebook.**
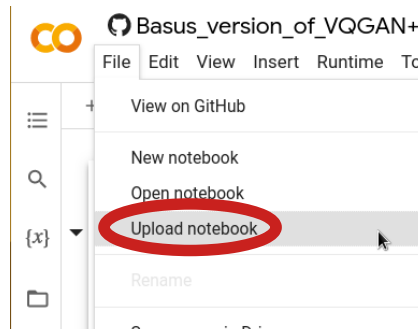

3. In the pop up box that appears, enter basu-10 and click on the most recent version (most recent date and time) of the Algorithm. The date and time is at the end of the file name.

(i) Click here to switch to the **GitHub** Tab

(ii) Type **basu-10** here

(iii) Click here to load
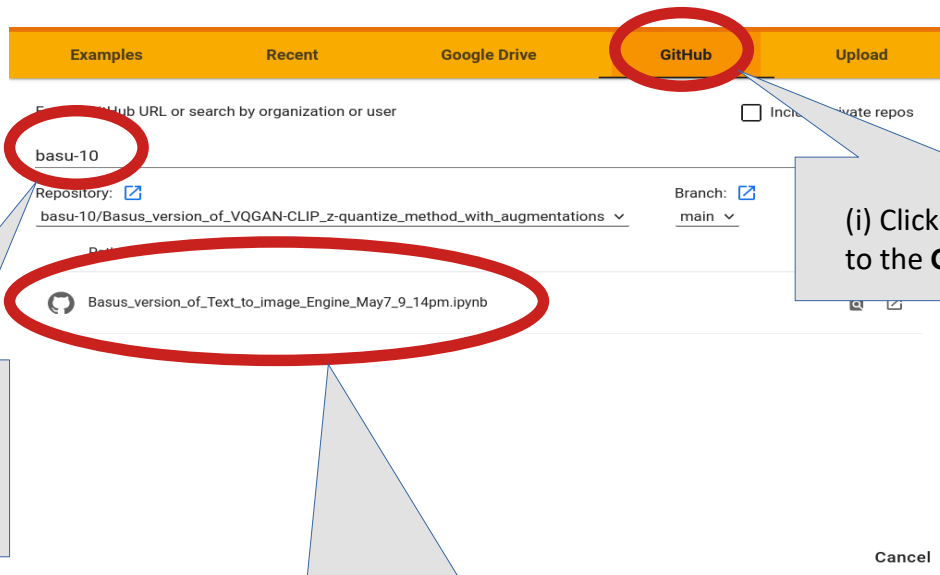

4. After the Notebook has loaded, Scroll down to the Title: **1. Check CPU, GPU**

See the Instructions and run the Code Blocks.

<- Click on this play button to Execute individual Code Blocks

This is how it looks when a Block is running
